

THE ROMAN CATHOLIC DIOCESE OF ROCKVILLE CENTRE

St. Joseph's Church (Interior), Garden City, New York

HE²PD, Inc. was retained by the parish of St. Joseph's Church to manage the execution of their capital campaign to perform interior renovations of the campus. The modifications to the interior of the church included paint, pews and kneelers, doors, and windows. In addition, the original organ was removed, refurbished and reinstalled. The church's mechanical, electrical and plumbing were also upgraded to accommodate the new system. The work was completed while the church and ancillary facilities were in full service.

HE²PD, Inc. prepared the estimates for the project, developed comprehensive schedules, and assembled all the necessary documents. HE²PD, Inc. played an integral part in controlling costs resulting in substantial savings allowing the parish to commission additional work on their exterior restoration project.
