

The Seawane Club Hewlett Harbor, New York

HE2PD, Inc. served as Owner's Representative for the renovation and upgrade of the Seawane Club, a well respected and highly rated golf and country club on the south shore of Long Island. The interior renovation, Phase II of the project, included the dining room, lobby, mixed grille, locker rooms, and other public spaces.

A critical part of this project was the scheduling of work during off seasons and the close coordination with the club management, so as to not affect the members.
